ABOUT US

PowerLink, founded in 2001, is a professional manufacturer of diesel generators, gas generators, diesel lighting units and mobile air compressors. PowerLink energy solutions can provide more choices. PowerLink UK factories and PowerLink China factories can provide fast delivery for users worldwide. More than 80, 000 generators have been delivered to users in more than 100 countries. Our product family includes four energy series: diesel generator set, gas generator set, air compressor, lighting tower, which can meet different standards. According to the needs of users, customized products can also be provided for users. Headquartered in Shanghai, PowerLink Group have manufacturing factories in China and the United Kingdom, and warehouses and sales centers in the United Kingdom, Australia and other countries to provide rapid solutions for product manufacturing, sales and technical services.

OPEN SETS

Start motor

Anti-Vibration Mounts

Air filter

Battery

Radiator

Charger

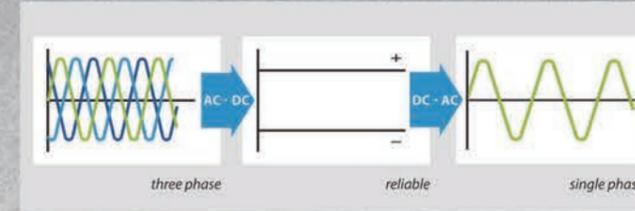

Based on the superior engines provided from Perkins, Cummins, Kubota, John Deere, Volvo and Mitsubishi, with an integrated exhaust system, oil feed, cooling system and control unit, we are achieving a complete unit with reliable performance. Open Set diesel generators for emergency standby power are manufactured and installed inside existing generator rooms or within 'new build' sites.

Equipments Standard and Optional

Category	Equipment	Status
Canopy	Mounted soundproof canopy	●
	Soundproofed canopy kit	●
	Modular sheet steel structure	●
	Phosphate priming followed by anti-corrosion polyester powder coat	●
	Flexible seals between body section	●
	Bnc connector plugs	●
	Standby bnc connector plugs	○
Acoustic Equipments	Silencer inside canopy (for Industrial)	●
	Two doors on each side (for Residential)	○
	Exhaust outlet with flexible	●
	Silence cotton inside canopy	●
	Emission purifier	○
Easy Maintenance Access	One door on each side	●
	Two doors on each side	●
	Lube oil drain pump	●
	Radiator fill access plate	●
Base	Electric panel door	●
	Base girder	●
	Inbuilt fuel tank or base tank	●
Lifting	Automatic fuel fill kit for frame tank	●
	Fabricated all welded baseplate with anti-vibration mountings	●
	Central lifting eye (U type lifting point)	●
Safety	Baseplate with retention tank	●
	Simple baseplate	●
	Lockable door with single key	●
	Lockable control panel	●
	Exterior emergency stop button	●
	Access to fuel, oil and battery through lockable doors	●
	Protective mesh for rotating parts	●
	Galvanised sheet metal air outlet duct	○
	Low voltage protection	○
	Over current protection	●
Grounding protection	●	

● : standard ○ : optional

OPEN SETS

Control System	AMF	Low oil pressure	speed	freq.	Emergency stop	temp.	current	Fail to start	volts
PLC-920	x	STD	STD	STD	STD	STD	STD	STD	STD
PLC-7420	STD	STD	STD	STD	STD	STD	STD	STD	STD
PLC-8610	x	STD	STD	STD	STD	STD	STD	STD	STD

Note:
 1. A PLC-7420 or a PLC-920 is the standard configuration, while PLC-8610 is optional and is used for automatic parallel operation.
 2. Applicable voltmeter, ampere meter and some other meters are indispensable for the PLC-920 system.

SOUND PROOF SETS

The investments made by PowerLink in the expansion and modernisation of the production facilities enables sufficient capacity for our customers' orders and any related peaks in demand. Quality reflected in the design and development of components. Cooperation with first-class suppliers such as Perkins engines and Cummins engines is an additional quality trademark.

SOUNDPROOF SETS

Many advantages securely keeping the power going...

Robust engine, stable performance

- Engines with excellent properties
- Ambient temperature from -25 C to 50 C
- Excellent filtration system
- High efficient alternator with full damper windings, which ensure a stable voltage, and quick recovery from frequency fluctuation whenever there is instant uploading
- Time between maintenance and service are maximized

High security

- All the design, production and tests are compliant with CE standards
- E-stop button and all breaker protections prevent potential danger
- Double-bundled base fuel tank ensure no fuel leakage
- Fully equipped with heat insulation and protective covers to give added protection from areas of high temperature.
- Clear and easy to follow signs to identify cable connection points
- Full suspension allowing units to be taken over rough terrain
- Units have easy towing facilities

Soundproof and waterproof canopy which can be used outdoor

- Soundproof design reduce noise by 20-35db (A)
- Canopies are made and coated by motor vehicles materials, Which are robust and durable, with a tidy appearance
- Excellent silencer and sound insulation materials
- Low emissions

Easy to operate and maintain

- Convenient for fuel and water filling
- Wide maintenance doors allow full access to check and carry out maintenance (Gensets above 250KVA are built with ladders)
- Gensets are easy to transport
- The control system is easy to operate
- Simple for connection
- All running data is available to find out on control system

Adaption of **DeepSea** control panel intergrated for the most convenient operation by the engineer.

The water re-filling cap on the **top of the canopy** makes it convenient to input water.

Fuel cap at the side enables refilling to be easier when there is a need to refill during operation.

Double bundled base fuel tank (Please see our technical specification for large fuel tanks on capacity etc)

The inner door panel is lined with **fire retardant & sound absorbing cotton**. Fully sealed rubber material around the door frame to isolated the heat/sound.

The **air filter** can adopt double-element, which can be used in larger occasions.

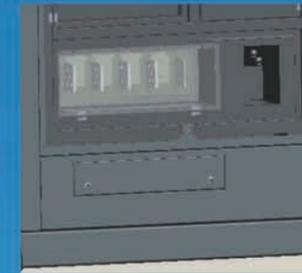

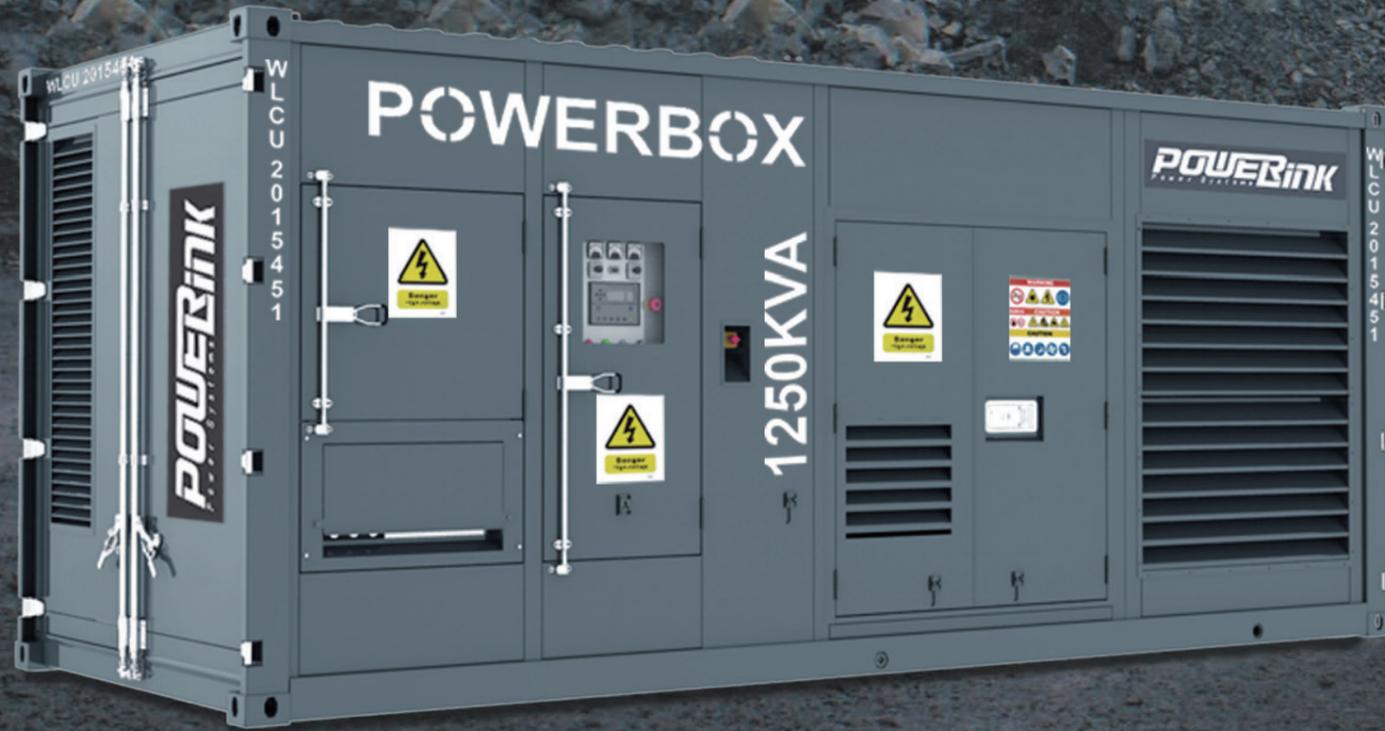

Advanced **AVM** device significantly reduces vibration during operation, ensuring stable operation of the genset.

The design meets the requirements of EU legislation 2000/14/EC.

CONTAINERISED GENERATOR SETS

EASY MOUNTED
EASY OPERATION
EASY TO MAINTAIN
HIGH RELIABLE

Wiring Terminals

Humanised design makes it easy for the wiring connection and distribution
Visual insulation design secures against unintentional switch-on

Cooling fan

Axial flow design
Large flux and quick discharge
Low noise

Radiator

Double vertical distribution
Copper material makes a good cooling performance
Large cooling area makes a quick cooling.

Automatic fuel refilling system

Auto/manual selection protection setting of fuel pump
No need to be present on site

High resistance against harsh environment

With canopy made of galvanized electrolyte board for car use only, it is rustproof for over 5 years. With high protection grade of control panels, access doors and standby boards, the generator is suitable to protect against strong wind and rusts.

The complete solution

No matter on continuous, emergency, standby service or generator power plant application, POWERLINK generator set will satisfy all your demands and provide power solutions for customised products

Work properly in 50 C

Double-chamber design separates the heat sources and makes it compact and work properly in 50°C with the compact configuration.

The integrated design

Internal monitoring, cooling circuit, fuel system, power system, cabling and piping, all of them are designed integrally, 100% matched components, consolidated controls... the only way to ensure total reliability

CONTAINERISED GENERATOR SETS

CONVENIENT REFUELING AND WATERING INSTALLATIONS

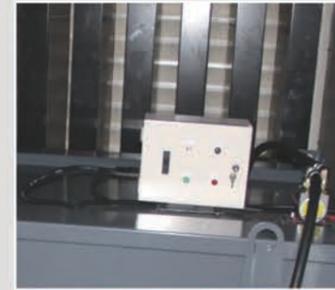

- Outer fuel inlet and coolant inlet.
- The genset is equipped with daily-fuel tank with automatic fuel refilling system.
- Fuel outlet at the base and drainage device.

Multi-stage fuel/water separator

High quality engine

Automatic fueling device

Built-in sound absorbing cotton

Control panel

Interior of the genset

EASY TO MAINTAIN

- The daily maintenance work can be performed on two sides of the machine, and wide doors allow you to easily access to the machine.
- Equipped with a climbing ladder, making it easier for regular maintenance and servicing.

EASY TO TRANSPORT

- Lifting pockets designed at the four corners of the container making it easier to move and transport, which is also convenient element for the rental market.

CONTROL SYSTEM

- Micro-processor cored digital system.
- Option for multiple languages, and has automatic controls

CONVENIENT CONNECTION

- An optional external quick connection panel can aid in the monitoring of mains, ATS transfer, and remote start.

SAFE AND PRACTICAL DESIGN

POWERBOX
www.powerlinkworld.com

1500KVA

CONTROL SYSTEM

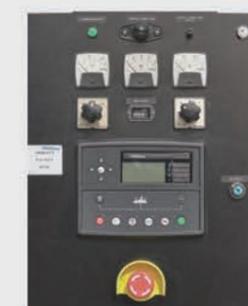

Powerlink generator controllers integrating digital, intelligent and network techniques are used as the automatic control systems for diesel generators. It can carry out functions including automatic start/stop, data measuring and alarms.

● PLC-7420

Upon detection of a mains (utility) failure the module automatically starts the generating set. Once the mains (utility) power has been restored it instructs the generator set to stop.

● Paraller Controller

By using inbuilt device with synchronisation, power matching and paralleling functions, the controller can be synchronised with mains, uninterruptedly returning when reaching the peak.

● PLC-920

PowerLink PLC-920 controllers integrating digital, intelligent and network techniques are used as the automatic control systems for diesel generators. It can carry out functions including alarms, warning & electrical trip, genset failure monitoring and controls etc.
